

LOVE'N WHITEPAPER

Love'n is the project for couples. As we know, love is very important for daily life therefore we want to share the love with people all around the world, regardless of age or ethnicity. Love'n is a Kiss-2-Earn project. When couples have a kiss. besides the inevitable happiness, they also receive a reward as the proof of love. For a happiness world

Science has proved the positive effects of kisses:

- Improve Immunity System
- Good for teeth
- Reduce stress
- Decrease the impact of allergies
- Lowers blood pressure
- Slows down the aging process
- Burns calories
- Increases sexual pleasure.

All of them coming with money? What an combination. That's why kissing along earning money is such a wonderful thing!

HOW LOVE'N WORKS?

Version 1:

Open the app and connect to your wallet, after that market screen will appear for you to choose challenge packs (The buy button will sparkling while the start button will off). There will be 3 packages: 1 minute, 3 minutes and 5 minutes.

After buying successful, press the start button and move to the video record screen. The artificial intelligence will begin the record when start kissing. Complete the challenge and get the token reward

(Kiss package is only monthly buying)

Version 2:

Kiss package can be buy quarterly, and yearly and cheaper than monthly buy.

There will be a couple mode for all people who downloaded the app, when press the searching button, system will automatically matching with the nearest people who is in searching mode too. After matching, random challenge will be announced then 2 people must meet each other and... kiss until the time requirement ends. When finishing the task, token rewards will be distributed

You can search 3 times a day, user need to buy a searching package to join in this mode (This is different from version 1 packages)

HOW LOVE'N WORKS?

Couple Mode:

- Buy Box and open random 3 NFT (bronze, silver, gold) can buy with token LOVEN
- Couples kiss for reward

Searching Mode

- Register through searching package which can buy with token LOVEN
- Match randomly with other user and complete the task to get the reward
